

The all new Duralok Fence System. It's the innovation that's dividing the nation.™

The fence revolution has begun.

Never before has such an innovative fencing system delivered a more dynamic option to privacy fencing in Australia. The Duralok Fence System is manufactured from a revolutionary PVC formula designed to stand up against the elements of the harsh Australian climate far beyond that of other, more common fence materials.

With its clean and refreshingly stunning looks, it is no wonder Australians are now realising PVC fencing is a real alternative to their long term fencing needs.

Duralok®
FENCE SYSTEM

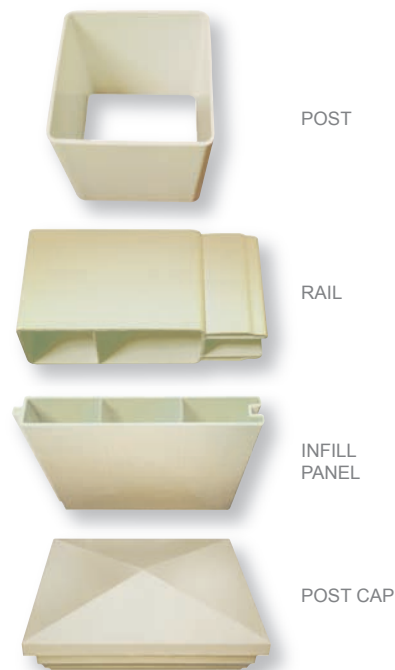

Duralok. It's the way of the future.

A Duralok fence will add considerable value to any home environment because of the many unique qualities and characteristics it provides:

- Duralok fences are strong and will not fade or discolour
 - Duralok fences look the same on both sides
 - The colour is throughout the material eliminating unsightly scratches
 - Durable and flexible to retain shape on impact
 - Will not rust or corrode
 - Heat resistant and fire retardant
 - Termite resistant
 - Duralok fences are quick and easy to install... and look great!
- Easier to remove unsightly hard water staining
 - Duralok fences require little or no maintenance
 - Can be recycled making them environmentally efficient
 - The specially formulated 'Biscuit' colour compliments any environment

Duralok Pty Ltd is an Australian owned and operated company that provides Australian communities with a better long term, low maintenance fencing solution over many other materials currently on offer.

The Duralok Fence System is the innovation that's dividing the nation.™
